

Guest Seminar

KSHV ORF57, a master regulator for viral RNA fidelity and virus replication

10:00-11:30 AM, Oct 15, 2012 @ Room 402, Institut Pasteur of Shanghai

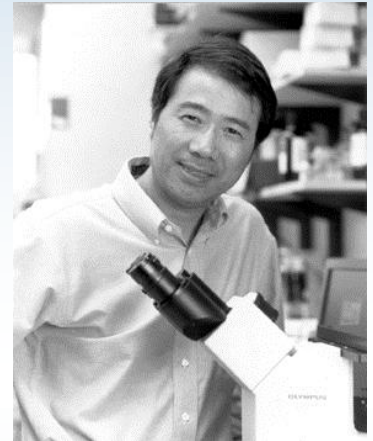

ZHENG, ZHI-MING, MD, PhD

HIV and AIDS Malignancy Branch

Head, Tumor Virus RNA Biology Section

Senior Investigator

National Cancer Institute

Host: Prof. Ke Lan

Abstract: The Zheng laboratory studies protein-RNA interactions and their subsequent consequences in oncogenic DNA tumor virus infection. The laboratory focuses on how protein-RNA interactions regulate gene expression of high-risk human papillomaviruses and Kaposi sarcoma-associated herpesvirus. Our long-term goal is to develop a series of RNA-based therapeutic approaches to control viral or cellular gene expression and to identify some biomarkers for clinical diagnosis and prognosis.
