Pasteur Colloquium-Senior

Title: Autophagy and innate defence against viral infection

[Speaker] Tom Wileman, Professor
University of East Anglia

[Time] 9:30:00-10:30AM, Sept.21, 2016

[Host] Prof. Gang LONG

[Venue] A0201 ,Life Science Research Building

Professor Wileman's research focuses on understanding how innate cellular defences control virus infection. His lab is currently funded to study the role played by autophagy and is developing mice with conditional tissue-specific expression of autophagy genes to study the impact of autophagy on infection 'in vivo'.
