Seminar

Arboviral infection in mammalian hosts: bunyavirus transmission, adaptation to host, and spread

[Speaker] Dr. Pierre Yves LOZACH

[Time] 10:30-12:00AM, May 9, 2017

[Host] Prof. Dimitri Lavillette

[Venue] A227 ,Life Science Research Building

[Speaker Introduction]

2013-now Cell Networks Junior Group Leader

Center of Infectious Diseases , Virology

University Hospital Heidelberg, Germany

2012 – 2013 Assistant Professor in Virology

INRS-Armand-Frappier Institute (Pasteur International Network), Laval, Canada

[Research Focus]

Pierre-Yves Lozach, Ph.D., is a virologist, cell biologist, and group leader at the Center of Infectious Diseases, University Hospital of Heidelberg. His group has made important contributions to the study of several bunyaviruses and published a combination of 12 peer-reviewed articles, reviews, and news during the last four years. And he is now building on his previous successes to pursue an exciting and dynamic scientific program in the field of vector-borne emerging diseases.
